DOC_ID: SAFETY_DOC_011
TITLE: Hepatrol - Notice to Prescribers on Presentation and Labelling
PUBLISHER: Regional Medicines Safety Committee
PUBLICATION_DATE: 2026-08-18
STATUS: ACTIVE

NOTICE TO PRESCRIBERS - PRESENTATION AND LABELLING

Reference: SAFETY_DOC_011
Date of issue: 18 August 2026
Publisher: Regional Medicines Safety Committee
Distribution: All prescribing sites; pharmacy

| SYNTHETIC DOCUMENT - NOT REAL MEDICAL GUIDANCE. Fabricated for a
| software demonstration. Hepatrol is an invented medication. Nothing here
| describes a real product or should inform any clinical decision.

1. Purpose

This notice concerns the presentation and carton labelling of Hepatrol. It contains no change to any monitoring requirement and no new safety information. It is circulated for pharmacy awareness only.

2. Change of presentation

The 40 mg tablet moves from a blister presentation to a bottle of sixty with a desiccant. The active substance, strength and shelf life are unchanged. Sites should exhaust existing blister stock before dispensing the new presentation.

3. Carton labelling

The revised carton carries the ALT monitoring reminder previously printed on the patient information leaflet only. The reminder text is a restatement of the requirement already in force under SAFETY_DOC_006 and does not create a second requirement. No change to the interval is intended or implied by this notice.

4. Reporting

Suspected quality defects with the new presentation should be reported through the usual site channel. There is no change to adverse-event reporting.

5. Contact

Queries relating to this notice should be directed to the Committee secretariat through the usual site channel.
